

To Our Valued Business Partners:

Harsco Industrial IKG, the first grating manufacturer in America and provider of grating solutions for over 100 years, is pleased to announce the opening of our new 50,000 sq. ft. manufacturing facility in Reno, Nevada. This new IKG facility will continue the tradition of providing the highest quality bar grating products and services in the industry. It is set to open for business on December 1, 2017.

Our current, unprecedented level of growth has allowed for us to expand our physical footprint to better serve the west coast market. Furthermore, the strategic location of our new facility will allow for unparalleled transit times to key metropolitan regions in the West. This desirable transit point, along with a broad range of products and services, will be another step in our commitment to continue providing the highest level of value and customer satisfaction in the industry.

Harsco Industrial IKG looks forward to serving the Western Region from our new Reno location. We are excited to connect with our existing customers and to meet new customers in the near future. If you have questions, or if we can be of service to you in any way, please contact our IKG sales office at 1-800-324-8417.
