

# METALS GROUP

 **Fleetwood** –  **SIGNODE**®

Founded in 1913, Signode is a global manufacturer of steel and plastic strapping, stretch film and the application equipment and accessories for each. Signode products are used throughout the world in a broad range of industries.

As the market leader in the metals industry, Signode's Fleetwood division provides a comprehensive line of packaging and handling products to protect metals during shipping, handling, and storage, including flat and cold rolled steel coils and aluminum. From protective products that minimize moisture and corrosion damage to accessory products that make storage and handling easier and safer, Signode has a full line of packaging products and equipment designed specifically for all types of mills and metal service center industry applications.

In addition to a full product line, Signode also offers the following capabilities and services:

- Packaging converting facility focused on customized packaging for the metals industry.
- Manufacturing capabilities of fully integrated packaging lines, including: Up-enders, turn-stiles, conveyors, strapping and wrapping systems, tooling, etc.
- An Application Development and Research department that utilizes International Safe Transit Association certified field and laboratory equipment to measure and duplicate the actual conditions products experience during the shipping and handling process. Customers can have their products and/or loads tested for rough handling, impact, and environmental conditions, etc. In return, Signode provides a comprehensive analysis with recommendations on the best and most cost-efficient way to protect their products throughout the transportation cycle.
- US service team with 93 highly trained technicians with an additional 9 in the Canadian market.
- Parts and Service department located in Glenview, IL provides parts and technical assistance 24/7.
- Over 50 sales representatives across the US and Canada.

Signode has assigned an experienced team of metal sales specialists to provide product support, application knowledge and industry expertise to metal service centers and mills within the NASA community. For more information regarding Signode and their products, please contact **Jeff Lukan at (724) 288-8445 or (JLukan@signode.com).**
